

UNItears[®] preservative free

eye drops, solution, preservative free

1. What UNItears preservative free is and what it is used for

UNItears preservative free is an eye drops, solution containing hypromellose and dexpanthenol. It has protective, epithelizing and moisturizing effect. Hypromellose forms temporary protective film on the eye surface, moisturizes the eye surface and serves as a substitute for a lack of tear production. It eliminates the feeling of "dry eyes", also provides relief from mild irritation to the eyes of non-infectious origin. Dexpanthenol (group B vitamin) helps to restore cells on the eye surface (epithelization).

UNItears preservative free does not contain preservatives, so it is ideal product for contact lens wearers and for people with sensitive eyes.

UNItears preservative free provides long-lasting relief:

- in decreased production of tears, in dry eye syndrome (keratoconjunctivitis sicca)
- in injuries and corneal erosion
- after eye surgery
- in discomfort (burning, itching, foreign body sensation, these symptoms may be related to external factors (e.g. air conditioning, wind, pollution, smoke, dust)
- in elevated eyestrain (by prolonged computer work) and the difficulties in seeing during the day
- when wearing contact lenses

UNItears preservative free can be used by adults, adolescents and children.

2. What you need to know before you use UNItears preservative free

Do not use UNItears preservative free:

- if you are allergic to any substance of this preparation
- in acute phase of corrosion of the eye until complete removal of corrosive substances from the conjunctival sac and the removal of dead tissue

If you currently use other eye products, it is generally preferable to wait for at least 5 minute between the application of each.

3. How to use UNItears preservative free:

The recommended dose is one drop 2-3 times per day. It can also be applied more often. UNItears preservative free can be used on long-term basis.

Warning

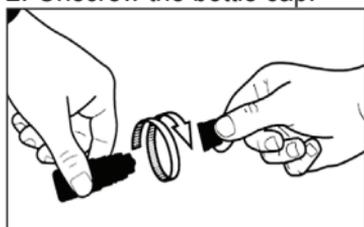

After application of this product you may experience transient mild burning sensation or blurring of vision. Wait until your vision is clear before driving or using machinery.

Contact lens wearers

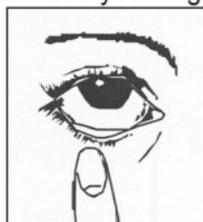

UNItears preservative free may be used while wearing contact lenses.

Caution before applying

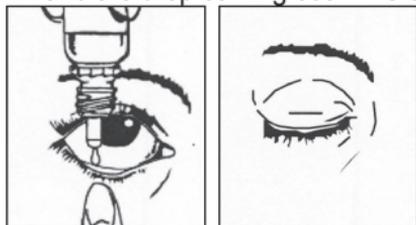

1. Wash your hands and sit or stand comfortably.
2. Unscrew the bottle cap.

3. Hold the bottle downwards between the thumb and the other fingers.
4. Before the first application it is recommended to drop off the first drop out of the eye by gently squeezing the bottle, because in strong and irregular squeezing of the bottle the solution can be ejected in a larger volume.
5. Use your finger to gently pull down the lower eyelid of your affected eye.

- Place the tip of the dropper close to your eye but so that it does not touch the eye or the adjacent regions of the eye.
- Squeeze the bottle gently so that only 1 drop goes into your eye. Then release the lower eyelid and slowly close the eye so that UNIfears distributes evenly along the surface of the eye.
For the next drop, let suck back the air into the plastic bottle to return to its original state, and then continue to apply to the eye as recommended. Please note that there might be a few seconds delay between squeezing and the drop coming out. The bottle must not be squeezed too hard.

- If necessary, repeat the procedure for the second eye.

- After use, the bottle should be shaken once in a downwards direction, without touching the dropper tip, in order to remove any residual liquid on the tip. This is necessary in order to ensure sterility of the eye drops and easier delivery of the next drop in a subsequent application.
- Immediately after application tightly close the bottle cap.

4. Possible side effects

Rarely, immediately after application you may experience a slight transient burning or allergic reaction to some of the substances of this product, or transient eyelashes bonding may occur.

If any of these symptoms or any other unusual reactions occur, contact your doctor or pharmacist.

5. What UNIfears preservative free contains

Hypromellose 5 mg per 1 ml, dexpanthenol, sodium chloride, disodium edetate dihydrate, water purified.

6. How to store UNIfears preservative free and other information

Keep the bottle stored in the original container at 25 °C.
